Or Additives**

Photograph the code with your smart phone!

Save your septic system with the patented and proven power of Aerobic Action.

- Eliminate foul septic odor and pooling liquid in septic drain field and prevent sewage backflow and back up.
- Fix sluggish drains, gurgling pipes and toilets that are slow to flush.
- Your septic tank discharge will be 90% cleaner than before, a benefit to your local groundwater.

Five Year Cost Comparison
Save thousands of dollars!

SEPTIC SYSTEM SAVER

up to \$7,000

Chemicals/ Additives

up to \$40,000

Excavation/ Replacement

University Studies Agree

"... adding an aerobic treatment device restores the original functioning of the soil absorption system (drainfield) in a matter of months..." — Purdue University

"... After 9 months of operation, the aerobic systems were discharging effluent 95% cleaner than before... clean enough to surface discharge..." — Baylor University
